

TOP WAYS TO SAVE WATER INDOORS

**Water restrictions are in place.
Keep saving by taking these key indoor actions.**

Only flush when necessary.
Don't use it as a dustbin.
'If it's yellow let it mellow.
If it's brown, flush it down.'

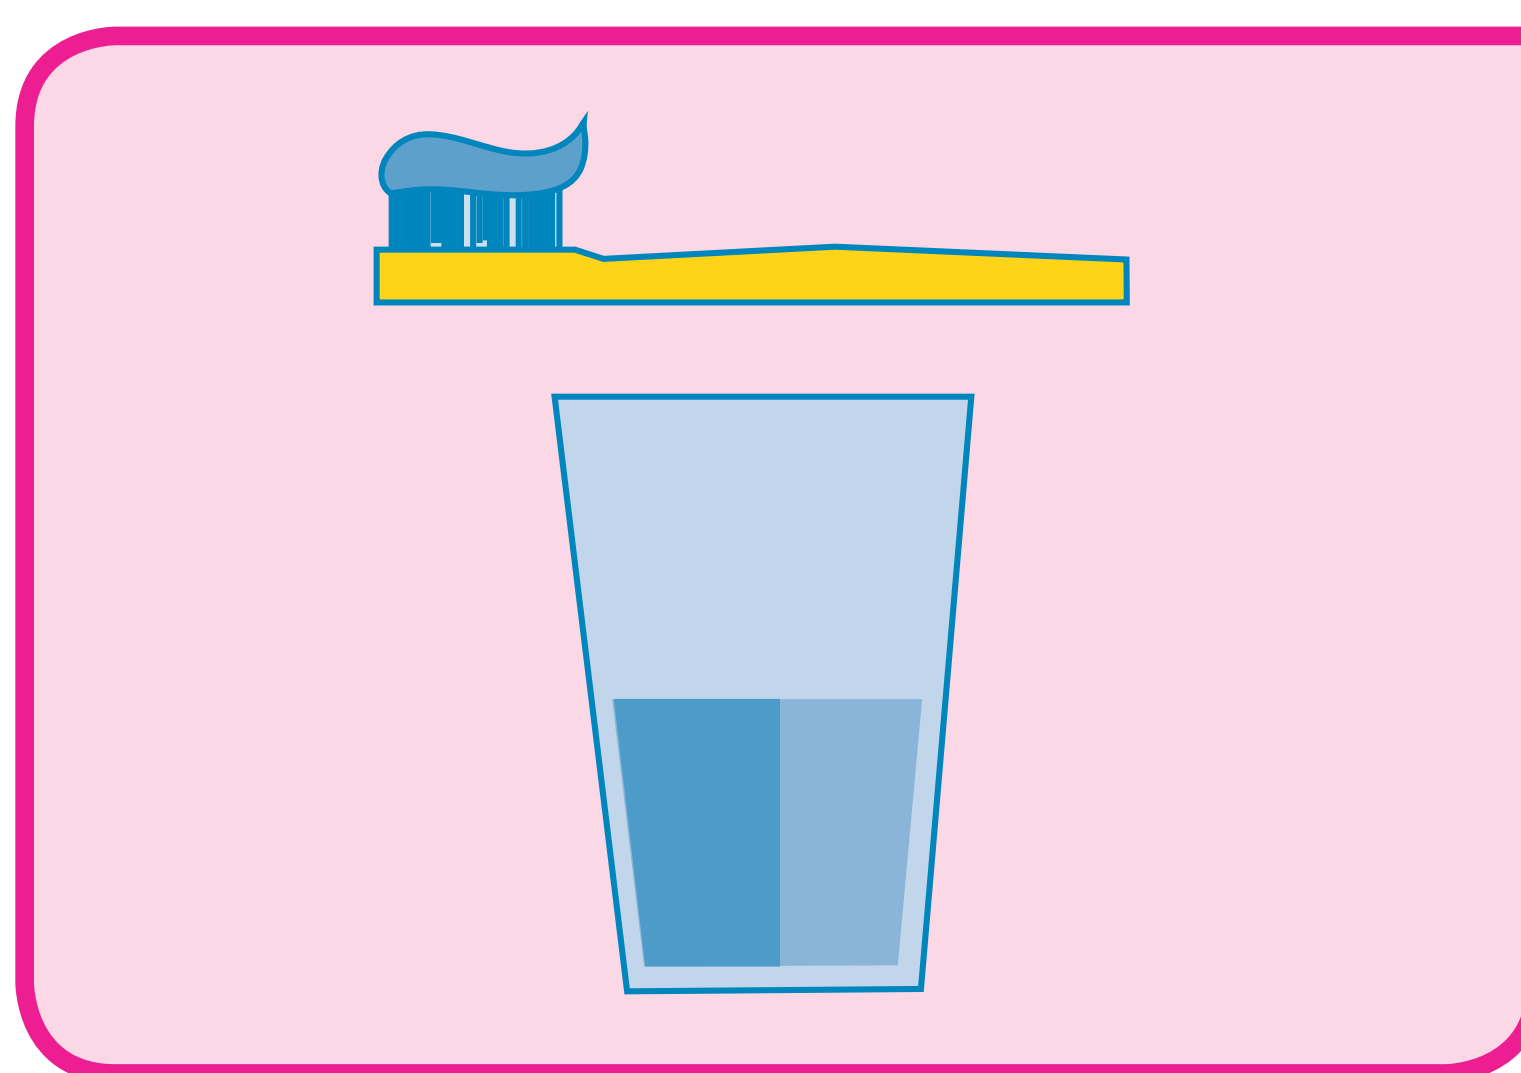

Take a short 2-minute shower.
A standard (non-water-saving)
showerhead can use as much as 16
litres per minute.

Collect your shower, bath and
basin water and re-use it to flush
your toilet. If extra, use for garden
and vehicle cleaning.

Wait for a full load before running
washing machines and dishwashers. The
rinse water from some washing machines
can be re-used for the next wash cycle.

Use a cup instead of running taps in
the bathroom or kitchen for brushing
teeth, shaving, drinking etc.

Do not defrost foods under
running water.

Switch to an efficient showerhead
which uses no more than
10 litres per minute.

Upgrade to a multi-flush toilet
and/or put a water displacement item
in the cistern which can halve your
water use per flush.

Fit taps with aerators or
restrictors to reduce flow to no
more than 6 litres per minute.

YOUR MUNICIPALITY IS ENFORCING WATER RESTRICTIONS IN YOUR AREA.

DON'T DELAY

Report burst pipes, faulty meters and water restriction offences.
