FIRST IN INTEGRATED FIRE MANAGEMENT

Veld and Forest Fire Qualification System Guide

The primary criterion for qualification is individual performance:

- observed by an Evaluator qualified in that position,

- documented in an approved South African ICS Working Team position task book (PTB).

POSITION TASK BOOK

- PTB's contain all critical tasks required to perform the job.

- The process of demonstrating the abilities to perform the position is the completion of a PTB.

- The tasks in each PTB have been established by subject matter experts from the South African ICS Working Team, and tested and approved by them

POSITION TASK BOOK

- Format, which allows for documentation of a Trainee's ability to perform each task.

- Tasks pertaining to tactical decision-making and safety require position performance on a veld and forest fire.

- Remaining tasks may be evaluated through other means such as a simulation, or emergency or non-emergency incident/event.
